RE: Addendum to National Registration of CRN 0F8388.5C

Dear Sir/Madame,

We are pleased to submit our application for additional product nomenclature to subject CRN. The attached forms are in support of subject national addendum.

Explanation of nomenclature addition addendum:

Ashcroft has updated the bourdon movement design (outside pressure boundary) of one of its CRN registered gauges. The new movement design falls under a new gauge product name "8008", and is also in addition to the "1008" product registered under CRN 0F8388.5C. There are no calculation updates, however, several new drawings are provided with this addendum for the record, and a matrix of correlation to the original drawings is provided in then updated calculation report. The scope of registration summary is also updated to add the 8008 nomenclature. Please find enclosed documentation:

1. TSSA national registration Service Application (1 copy)
2. Statutory declarations for TSSA, ABSA, Uniform Statutory Declaration form, Manitoba Statutory Declaration form (2 originals of each signed and notarized)
3. Proof of Quality Control Certificate (8 copies)
4. Updated scope of registration summary SOR-SG-REV1 (8 copies)
5. Updated calculation report PRP-SG-REV1 (8 copies)
6. Request for expedited service form (1 copy)

Thank you.

Re: Fittings Registration

The Province of Saskatchewan will be participating with Quebec, Manitoba and the Canadian Standards Association (CSA) in a pilot project for the registration of fittings. We will recognize registrations done by CSA and accept such fittings for use in Saskatchewan.

The letters CSA will be applied as a prefix to the CRN to indicate which fittings have been registered in this manner. I would appreciate if you could inform your clients of this additional marking requirement.

You may also inform your clients that fittings registered by CSA are accepted for use in Saskatchewan.

Yours truly,

N. Surtees, P. Eng.
Executive Director
